

Dell XPS 13 SSD Replacement

This guide shows you how to replace the SSD in the Dell XPS 13.

Written By: The Raptor

INTRODUCTION

This guide shows you how to replace the SSD in the Dell XPS 13.

TOOLS:

- [T5 Torx Screwdriver](#) (1)
- [Phillips #0 Screwdriver](#) (1)
- [iFixit Opening Picks set of 6](#) (1)
- [Spudger](#) (1)

PARTS:

- [WD Blue 250GB Internal SSD](#) (1)

Step 1 — SSD

- Remove eight T5 Torx screws
- Lift the plastic tab
- Remove a Philips screw under the plastic tab

Step 2

- Use opening picks to open the lower case

Step 3

- Disconnect the battery and move the battery cable out of the way.

⚠ Open the display and press the power button for five seconds to drain any remaining charge from the system.

Step 4

- Remove a Philips screw holding the SSD
- Pull the SSD parallel to the motherboard
- ⚠ Do not lift the SSD upward or risk damaging the SSD slot

To reassemble your device, follow these instructions in reverse order.
